FRIDAY

8:00 – Breakfast

8:30 – Flag Raising

9:30 – Ice Cream Social

10:00 – Closing Service

11:00 – Check Out

Frequently Asked Questions

1. Do we need any special equipment to participate in science camp?

All of the supplies for activities will be provided but please remember to bring along a reusable water bottle. We will be out and about during the day and it will be important to stay hydrated. Reusable water bottles will also allow us to care for the creation we are enjoying by reducing the waste we produce.

2. Will Horse Rides be available?

Horse rides are available this year. Please sign up before arriving for registration. They will be for approximately one hour on one day during the Swim Time.

3. If my child has a friend coming along, will they get to stay with them?

When you register your child there should be an option to put down cabin mates, make sure to put your camper's friends down under that and we will make sure they will be together!

4. Will the campers have opportunity to enjoy traditional camp activities?

During most days your camper will spend the majority of time doing Science related experiments and activities. They still have an opportunity to swim every day, and counselors usually get some traditional activities in during the evenings during cabin time.

5. What happens if my child gets homesick?

Homesickness is common among campers, especially those that are younger and are not used to staying away from home. Our staff is trained to work with children who are homesick, and work with campers to help them enjoy their time at camp! Please do NOT tell your campers that they can call home, studies done by the American Camping Association and the Christian Camp and Conference Association have shown that this increases homesickness and increases the child's odds of needing to be sent home.
